

# SONICS SHOUTOUT EVENT 1

## Day 0 – Drive Team

Our drive team arrived at Standish-Sterling Thursday night with robot in tow. Load in and inspections took place, and the drivers began to get a feel for the full field, and ran a few practice matches.

## Off to the races

Our competition season is off to a great start with an abundance of team spirit. We walked away from our first event with pride, and we are looking forward to next week's competition.

## Day 1

The first day of competitions started out with a bang when the full team arrived, got in positions for scouting and began a full day of qualification matches. Some students got chances to talk to judges while helping in the pits, and others got the opportunity to scout other teams, aiding in alliance selection.

## And the award goes to...

This event, the TriSonics were recognized for the 2023 Industrial Design Award sponsored by GM.

This is a great honor for our team, and we are very grateful for the judges consideration.

## Day 2

Day 2 started out with wrapping up qualification matches. Afterwards, the top 8 ranked teams made their selections for the final matches. We were selected to be in the sixth seeded alliance and to compete in the playoffs with them.

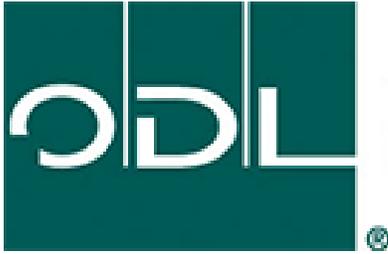

## Interested in sponsoring?

Our program is always welcoming new sponsors! If you think this is something your organization would consider, contact us at [sponsorship@allendaleroobotics.com](mailto:sponsorship@allendaleroobotics.com) or scan the QR code for more details.
